## CERTIFICATE OF ANALYSIS

### **BenchMark™ Fetal Bovine Serum Heat Inactivated\*** **(Catalog Number 100-106)**

Lot Number : A45H00L

Our fetal bovine serum meets all USDA requirements and has passed ante and post-mortem inspection by a licensed veterinarian. It is collected in countries recognized as being free of foot-and-mouth disease and rinderpest. The origin of all fetal bovine serum is traceable by lot number, date and country of collection. Precipitates may develop in this product upon freezing and/or thawing; this occurrence does not impact culture performance. \*Some geographic regions may test higher than 0.300 mg/mL. If this be the case, refer to GGT results less than 10 U/L to ensure FBS purity. \*Results shown were obtained prior to heat inactivation by carefully performed methods believed to be reliable prior to heat inactivation

The testing that has been performed as part of this lot release has been reviewed by Quality Assurance personnel and has confirmed that the testing meets the specifications presented on this Certificate of Analysis.
